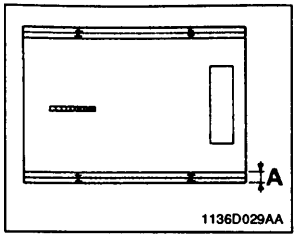
(9) Adjustment of the 1st/2nd Drawer Reference Postion

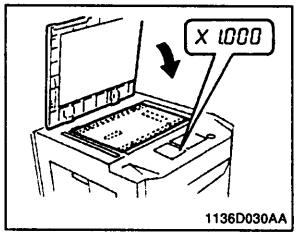
◆Requirement



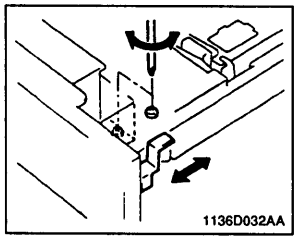
- A copy of horizontal lines A (width 20 mm), shown in the left figure, in the GTC-001 chart, should have a width of 20 ±2.0 mm.

◆Important

- This adjustment should be made after completion of the steps described in (6) Adjustment of Crosswise Magnification.



1. Place the GTC-001 chart face down on the Original Glass and align its rear left corner with the reference marker on the Original Width Scale on the left side of the platen. Close the Original Cover.
2. Feeding two sheets of A3 or 11" x 17" paper from the 1st Drawer, make two full size copies.
3. Measure the width of lines A on the second copy.



4. If the measured width is not 20 ±2.0 mm, slide out the 1st Drawer. Loosen the two screws shown in the left figure and move the Tray Positioning Plate toward the front or rear.
5. Repeat steps 2 to 4 to adjust the reference position of the 2nd Drawer.

Adjustment procedure

When the copy of width A is 18 mm or less: move the Plate toward the rear. When the copy of width A is 22 mm or more: move the Plate toward the front.
