(9) IR/Shading Position

- Setting value range: 60 to 140
- Movement equivalent to 10 steps of setting value: 1.227mm
- Increase the setting value to move to the right (scanning position).
- Decrease the setting value to move to the left (scanning position).

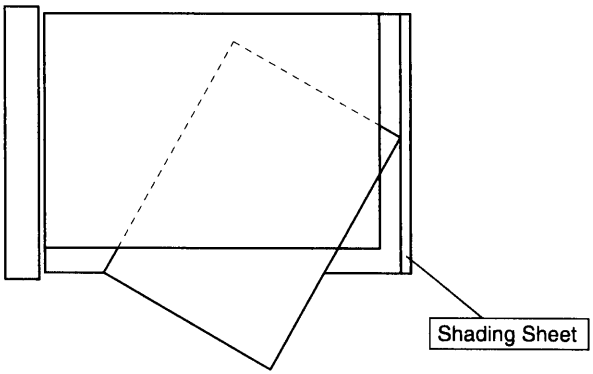

Confirmation matter before adjusts
- The original glass must contact the CD scale folder side.

1177D098AA

Adjustment method

1. Position an original (solid black, colored paper) as shown below and, with a sheet of A3 paper placed on top of it, make a copy. Then, check the image of the copy.

1177D080AB

NOTE

When positioning the paper, make sure that the corner of the paper is in contact with the Shading Sheet.

2. Change (increase) the adjustment value in Adjust Mode A9 (IR/Shading Position) to move the shading position until the void on the copy image disappears.
