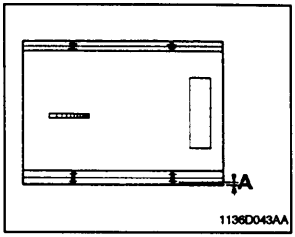
14) Adjustment of the Unexposed Areas/Edge Erase Lamp Position

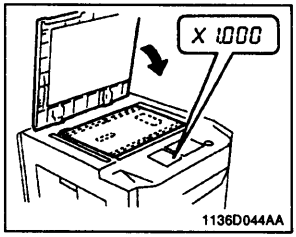
Requirement



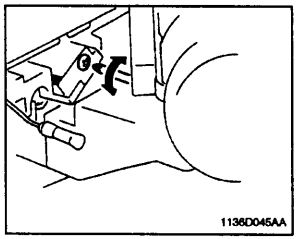
- A copy of reference dimension A (width 3.0 mm), shown in the left figure, of the GTC-001 chart, should have an erase width of 0.5-3.0 mm.

Important

This adjustment must be made after the reference positions of the Manual Bypass Table and 1st and 2nd Drawers have been adjusted.



1. Place the GTC-001 chart face down on the Original Glass and align its rear left corner with the reference position marker on the Original Width Scale on the left side of the platen. Close the Original Cover.
2. Make five single copies on A3 or 11" × 17" paper in the full size mode (×1.000).



3. Check the erase width in dimension A on the second copy. If the erase width is outside 0.5-3.0 mm, turn the Edge Width Adjuster screw in the direction shown below:

Adjustment procedure

When the erase width in dimension A is 0.5 mm or less: clockwise.
When the erase width in dimension A is 3.0 mm or more: counterclockwise.
