EP1054

PARTS MANUAL

MINOLTA

PREFACE

1. The part numbers listed in Parts Manual are those which were assigned to the parts making up the machine at the time machine was originally introduced onto the market.

2. Parts whose numbers are preceded by an asterisk in the Index Column on the List Page are parts to be used in only certain market areas. Therefore, please check the number in the Area cloumn on the List Page and then compare it with the numbers given in the Area Chart on page II to find out which part number is applicable to your own ares.
   NOTE: Parts for only certain Market Areas: The part numbers for these parts vary according to market area. In other cases, these parts are used in only restricted areas.

3. The Index Number on the List Page is composed of two numbers and two letters. Generally, only A is used as the first letter of the two letters. However, sometimes B, C, D, etc. are used when one part in the illustration, such as an electrical parts or a part which varies according to market areas, has two or more part numbers. The second of the two letters represents the modification history of that part.

4. The Areas Number is listed in the Areas Column for only those parts used in certain market areas. This Area Number represents the areas listed opposite to It in the Chart given on Page II. Parts having no Area Number listed in the Area Column can be used in all market areas.

5. In the exploded views in this Parts Manual the parts (Screws & Washes, etc...) which are indicated with a "four-digit" numbers are listed in numerical order in the section "SCREWS AND WASHERS". Please check these "four-digit" numbers with the part numbers ("ten-digit" numbers) which should be used for ordering the part.

6. All part numbers consist of "ten-digit" which should all be quoted when ordering a part. The price of parts can be obtained by referring to the "Parts Price List" which is separately issued.

7. All infomation contained in this parts manual is subject to change.

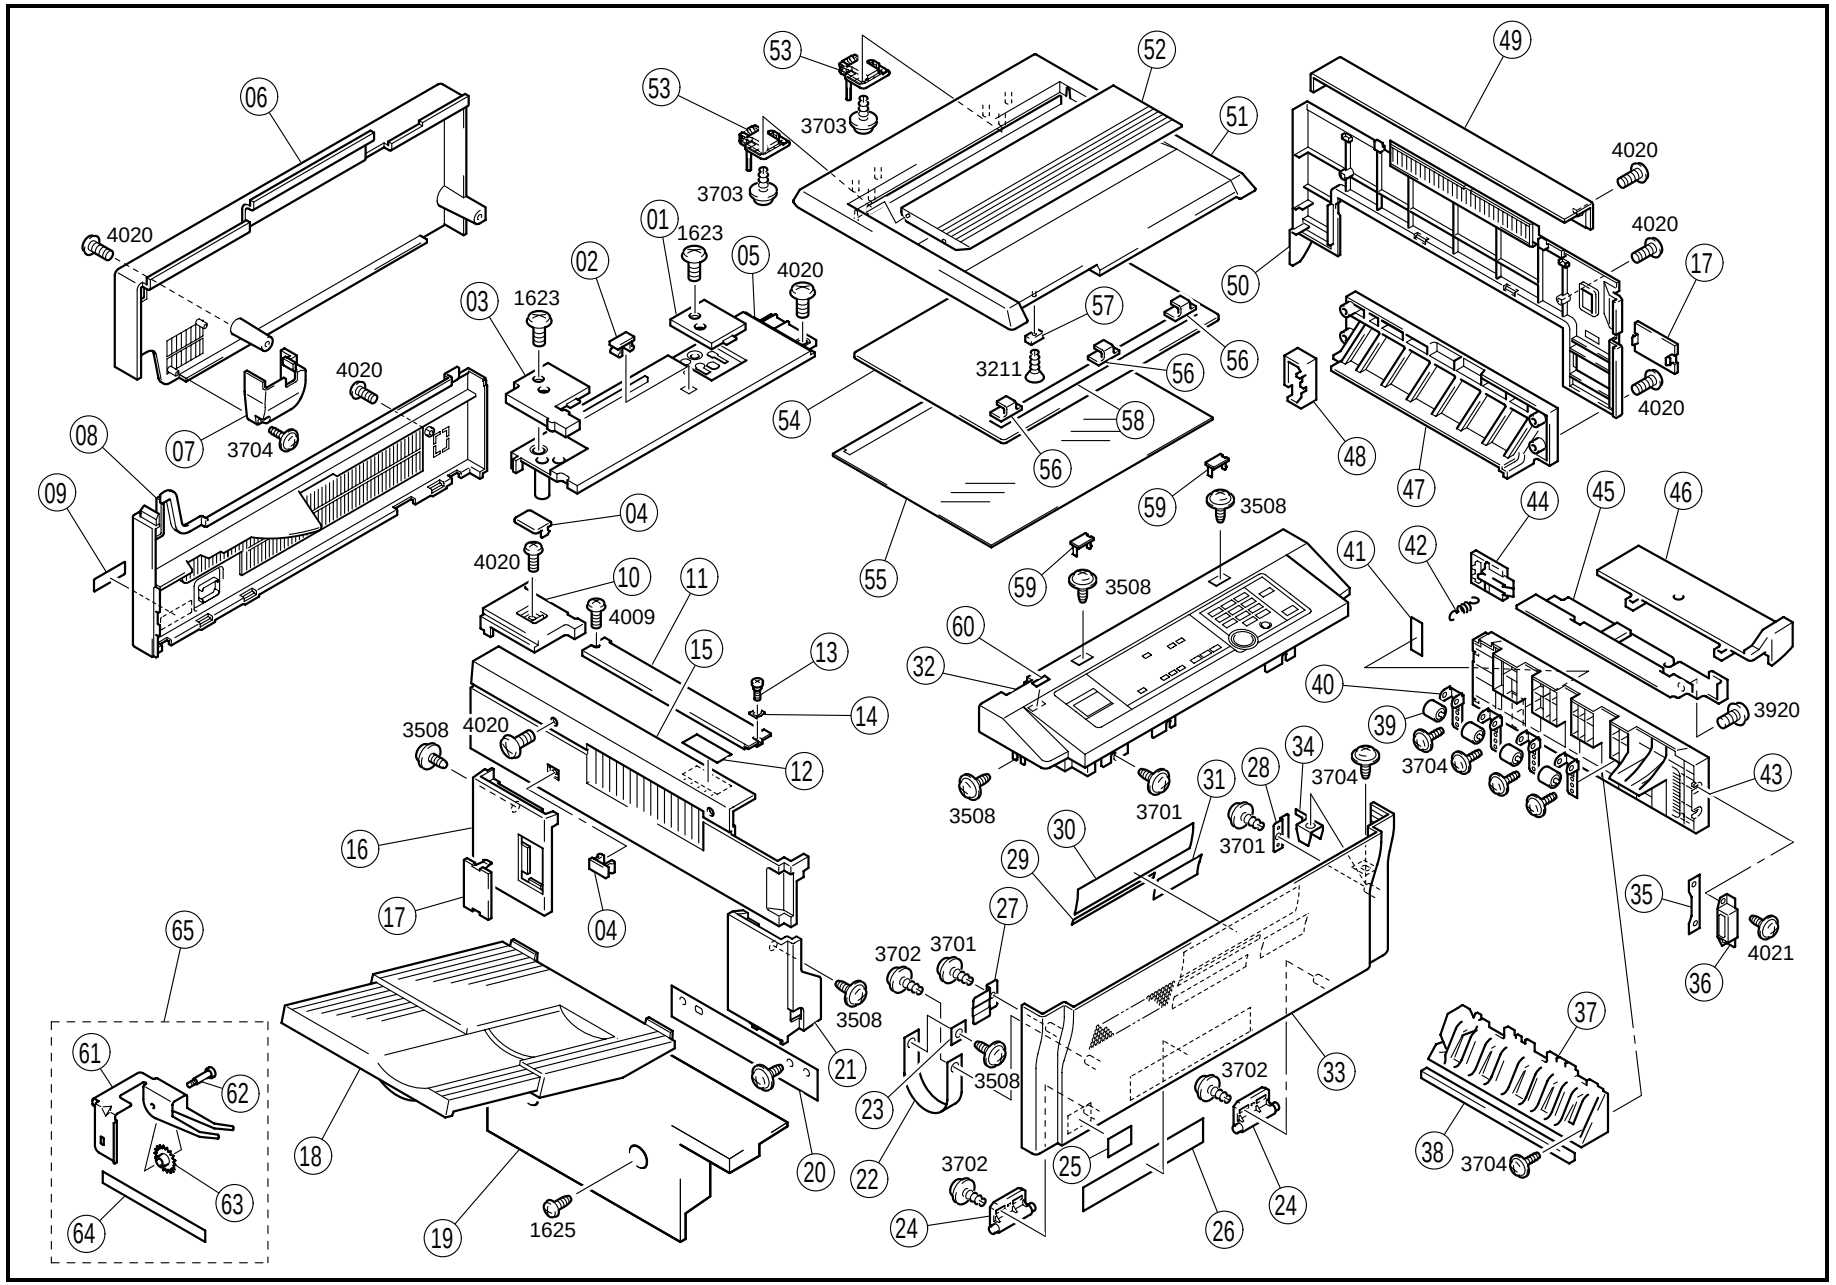

AREA CHART
