

NOTE

When reinstalling the Temperature Detector Assy, be sure that both ends of the Assy make full contact with the frame.

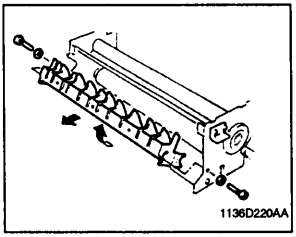

16. Remove two screws and the Lower Guide Plate.

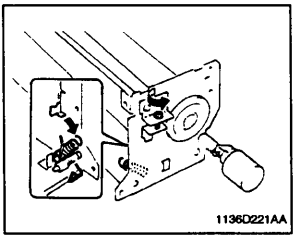

NOTE

When reinstalling the Lower Guide Plate, press the Plate in the direction of the arrows. Make sure that gap A shown in the figure is 0.8 mm. Also make sure that the rear end of the Lower Guide Plate is pressed against, not riding on, the rear bushing of the M7 jam removal shaft.

17. Remove two screws and the Lower Exit Guide Assy.

18. Loosen the screw that secures the spring bracket at the front of the copier and then unhook the spring at the top.
    Repeat the step for the spring at the rear of the copier.

NOTE

When reinstalling the springs, altemately tighten the bracket mounting screws untill the brackets completely contact the ends of the Lower Exit Guide Assy.
