- ☐ Action as given below
- ■ Action if required
- ☐ Refer in need

**Parts Compatibility**
- ☐ Compatible
- ☐ Conditionally Compatible
- ☐ Not Compatible
- ■ Old Obsolete

**Handling of Modified Parts**
- ☐ Free of Charge
- ☐ Conditionally Chargeable
- ■ Chargeable

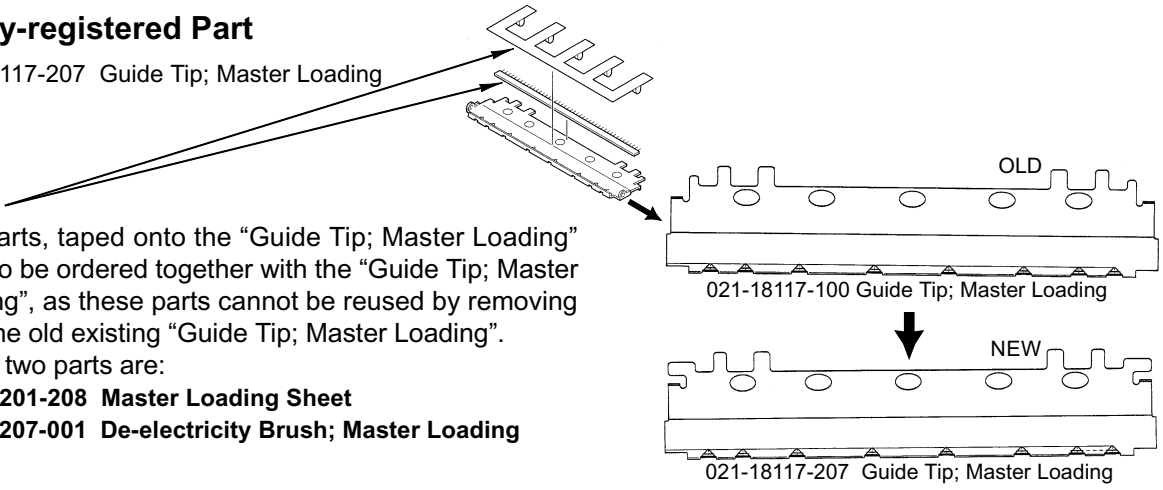
## SUBJECT: 021-18117-207 Guide Tip; Master Loading

### Brief:
The shape of the "Guide Tip; Master Loading" was changed.

### Reason:
Curled master had tendency to clamp under the Clamp Plate of the Drum with the tips on both ends folded. This resulted in master disposal error, as the folded portion of the master at the leading edge hesitated from entering into the master disposal area.

### Modification:
The both ends at the tip of the "Guide Tip; Master Loading" were extended out to prevent the front tip corners of the master material to curl and end up folding under the Clamp Plate.

### Newly-registered Part
021-18117-207 Guide Tip; Master Loading



**Note:**
Two parts, taped onto the "Guide Tip; Master Loading" need to be ordered together with the "Guide Tip; Master Loading", as these parts cannot be reused by removing from the old existing "Guide Tip; Master Loading".
These two parts are:
**021-18201-208 Master Loading Sheet**
**021-18207-001 De-electricity Brush; Master Loading**

**Please refrain from ordering this part yet, as the part has not come into our stock yet. We will inform you when ready.**
