## (11) Removal of the Scanner Drive Cable

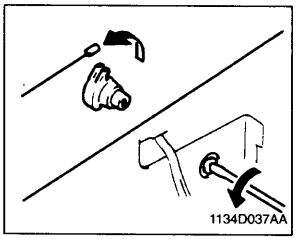

1. Remove the Original Cover.
2. Remove the Right Cover, Rear Cover, Rear Upper Cover, and Upper Left Cover.
3. Remove the Original Glass.
4. Remove the Scanner.
5. Remove Scanner Motor M2.

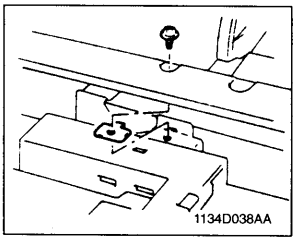

6. Remove two screws to free the SCP Board (PWB-F) mounting bracket.
   *The illustration shows where the SCP Board has been removed for ease of understanding.

7. Remove two screws and Original Glass Cooling Fan Motor M5.

8. Using a flat blade screwdriver, loosen the right spring anchor to unhook the bead from the anchor, thereby removing the cable.

9. Move the Scanner to the center and remove the Scanner Fixing Bracket.
