OPTIONS MAINTENANCE SCHEDULE FOR EP5000/EP4000

This Maintenance Schedule is intended to be used as reference information for establishing effective field service activites. To keep the copiers in as optimum a condition as possible, it is recommended that the maintenance jobs described in this schedule be carried out.

It should be noted, however, that frequency of maintenance jobs determined by the number of copies is simply a guide line. Therefore, service management personnel can revise or amend this schedule by taking into account their own individual field experiences. We feel that this will ensure more effective copier maintenance for your customers.

* The maintenance cycle numbers given below represent the readings on the PM Counter of the copier.

C : Cleaning R : Replacement Unit: 1000 Copies
