Symbology

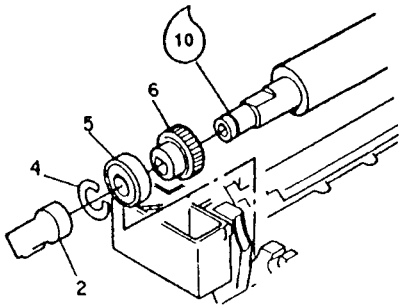

(15) This symbol shows that the part has been changed by tag number within circle. Information on modification is in change tag index.

(15) This symbol shows that the configuration of part shown is the configuration, before the part was changed by tag number within circle.

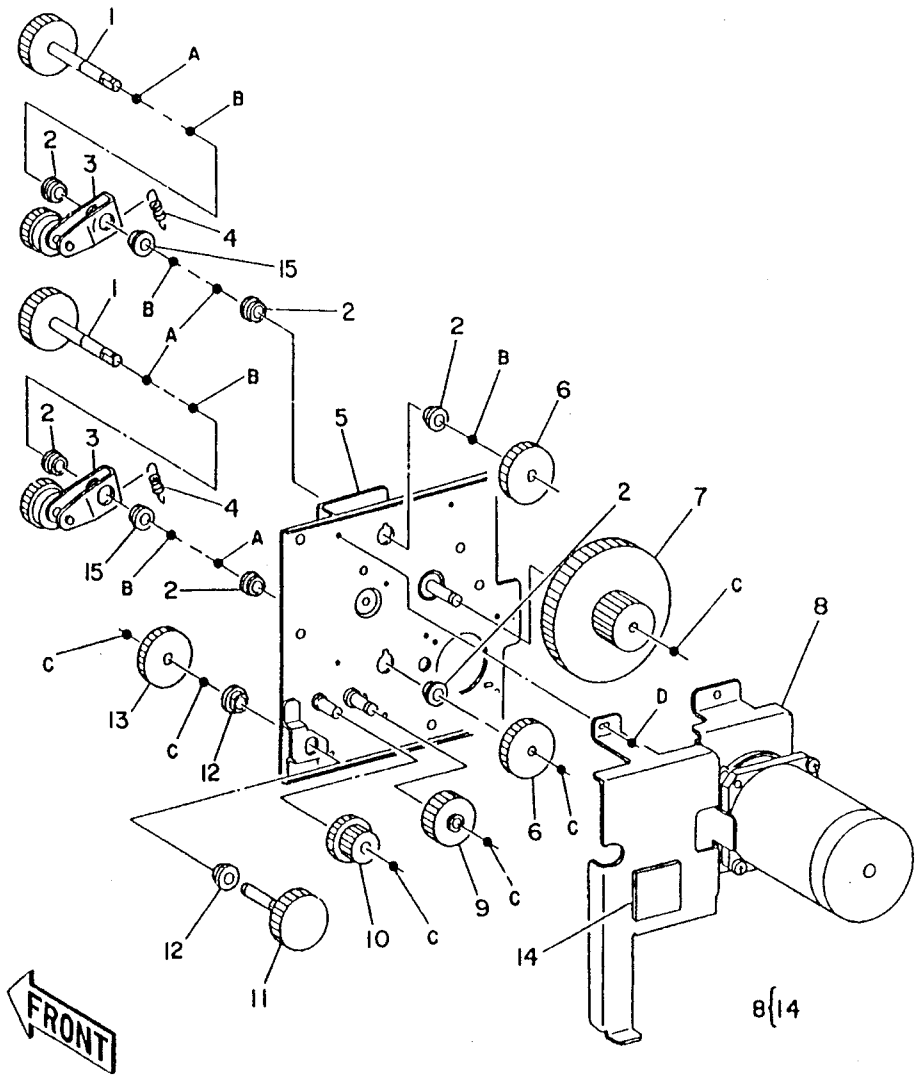

(10) This symbol shows where a part must be lubricated, and what type of lubrication must be used by the number in the symbol. The description and part number is in the parts list.
